

Open Positions for Masters Students

Culturing the Uncultured

Department of Aquatic Microbial Ecology,
Institute of Hydrobiology, Na Sádkách 702/7, 370 05 České Budějovice

At least two positions are open in the Laboratory of Microbial Ecology and Evolution for culturing as yet uncultured freshwater eukaryotes.

What is the project about ?

- Growing unicellular eukaryotes from freshwater habitats in the laboratory
- Learning to use microscopes and taking cool pictures
- Extracting DNA for sequencing
- Sequencing a genome yourself using Oxford Nanopore Minion (available in the lab)
- Assembling the genome and performing preliminary genomic analyses on our linux servers

I like this! What do I do now?

send us an email and get in touch!
